Grevillea Thelmanniana	1.00						Yucca Aloifolia		1.50				
Genista Scoparius Andreaea		1.50					Wisteria, Blue			2.00			

OUR HARDY STOCK

The distinct advantage of our ornamentals over those usually found are that they are all hardy, open field stock, with a well branched root system grown in a cool, even climate. They will not be stunted on transplanting, but take immediate hold, and make larger sized and handsomer ornamentals than the usual pot or can-grown from a lathe house.

Only well-balled and hardened stock is released from our nursery, so that they will transplant well and start to grow rapidly when properly cared for in their new locations.

Ask for special prices on quantity purchases, reductions on lots of 10 to 100 of a variety.
